

Be Right™

Reagent Addition Module for SAC850 or SAC950

Product #:	X91T096
ZAR Price:	Contact Hach
Available	

The Reagent Addition Module contains peristaltic pumps used to add reagents as part of a sample preparation process with volume accuracy around 1%. The Reagent Addition Module consists of a peristaltic pump assembly, a reagent addition tip and silicon tubing.

Minimizes sample preparation time

Simplifies the operator's tasks

Increases sample throughput
