

# HQ11d Portable Meter Kit with PHC101 pH Electrode

Product #:

HQ11D53101000 🛕 Hazardous

**OBSOLETE ITEM** This item is no longer available. Items with this mark may be considered hazardous under some shipping conditions.

Suggested replacements: • PHC10101

If necessary, we will change your selected shipping method to accomodate these items.

## Rugged portable meters for use in the field and plant.

Designed for your pH applications, the Hach HQ11D portable pH meter is an advanced handheld digital meter that takes the guesswork out of measurements. The Hach HQD digital pH meter combines reliability, flexibility and ease of use. The HQD portable meters connect with a wide range of Intellical smart pH electrodes addressing different sample types and operating environment for water quality, environmental and treatment process purposes. The Intellical probe automatically recognize the testing parameter, store the calibration history, and method settings to minimize errors and setup time.

Intellical<sup>TM</sup> PHC101 is a digital combination pH electrode with built-in temperature sensor. PHC101 has low maintenance needs thanks to a non-refillable gel-filled single open reference junction. The laboratory version of this pH electrode is shockproff with its epoxy plastic body protecting down to the glass bulb sensing element. The PHC101 electrode is ideal for measuring pH in wastewater, drinking water and general aqueous applications. The PHC101 is not suitable for use with organic solvents or samples with pH less than 2.

Replaced by NEW HQ Series.

#### Rugged pH meter for efficient field water testing

Single input channel for pH, Oxidation Reduction Potential (ORP/mV) and temperature - connect to any pH or ORP Intellical<sup>™</sup> smart electrode, probe and sensor.

#### Intuitive user interface for simple operation, reliable and accurate results

Guided calibration and check standard routines reduce calibration errors while stabilization alerts and visual measurement lock ensure that you can trust the accuracy of the results. Calibration status indicator and custom calibration alerts ensure accurate results.

## Trust your measurements - Intellical™ smart probes store all calibrations in the probe

Calibration history allows quick and easy change out of probes without re-calibrating. The HQD smart system records serial numbers, current calibration data, user ID, sample ID, time, and date automatically in the data log for complete Good Laboratory Practice (GLP) traceability.

## Designed for demanding field operating conditions and ease of use

Rugged and waterproof meter design provides worry-free, reliable operation in field environments. All connections between the meter and the probe are secure. Connectors can be color-coded for quick identification. Information is clearly displayed on the one screen with back light for low light conditions. Display results can be enlarged.

## Complete convenient kit

Package content includes everything you need to start testing. Details below

# Specifications

AC Power Adapter and USB/DC Adapter: Optional Automatic Buffer Recognition: Yes

| Calibration Intervals/Alerts/Reminder:          | Off, selectable from 2 hours to 7 days                                                                                     |

| Printer:                    | Yes, Optional                                                                                                                                   |
| Probes included:            | PHC10101                                                                                                                                        |
| Salinity Measurement Range: | 0 - 42 (ppt) (‰)                                                                                                                                |
| Salinity Resolution:        | 0.01 (ppt) (‰)                                                                                                                                  |
| Sensor A:                   | PHC10101 (1 m)                                                                                                                                  |
| Sensor B:                   | NA                                                                                                                                              |
| Sensor C:                   | NA                                                                                                                                              |
| Sensors:                    | Sensor A: PHC10101                                                                                                                              |
|                             | Sensor B: NA                                                                                                                                    |
|                             | Sensor C:                                                                                                                                       |
| TDS Measurement Range:      | 0.00 mg/L - 50.0 g/L NaCl                                                                                                                       |
| TDS Resolution:             | 0.01 mg/L up - 0.1 g/L upon measuring range                                                                                                     |
| Temperature Compensation:   | Automatic Temperature compensation for pH                                                                                                       |
| Temperature Measurement:    | °C or °F                                                                                                                                        |
| Temperature resolution:     | 0.1                                                                                                                                             |
| Type of measurement:        | Field Measurements                                                                                                                              |
| Warranty:                   | 36 months                                                                                                                                       |
| Weight:                     | 335 g (0.75 lb) without batteries; 430 g (0.95 lb) with                                                                                         |
| What's included?:           | Meter package includes HQ11D Portable Meter; 4 AA batteries, PHC101 Laboratory Gel pH Electrode, 1 m cable; quick-start guide and user manuals. |

## What's included?

Meter package includes HQ11D Portable Meter; 4 AA batteries, PHC101 Laboratory Gel pH Electrode, 1 m cable; quick-start guide and user manuals.
