

REF201 Universal reference electrode, 7.5mm, Red Rod

Product #:	E21M009
ZAR Price:	Contact Hach
Ships within 1 week	

General-purpose Red Rod reference electrode with banana plug. Liquid junction: porous pin, salt bridge solution: sat. KCl. Temperature range -10 to 100°C.

Red Rod electrodes feature:

- Reproducible measuring conditions
- Fast and accurate response
- Wide temperature range
- Stable signal
- Trouble-free liquid junction means less risk of clogging

Specifications

Reference electrode:	REF201
Warranty:	12 months
