

Sension+ pH combination electrode 5221 with sleeve diaphragm and screw cap S7 for creams, viscous and dirty samples.

Product #: LZW5221.97.0002
ZAR Price: Contact Hach

pH combination electrode 5221 with sleeve diaphragm and refillable electrolyte. Glass body, range 0-12 pH, 0-60 °C, screw cap S7.

This electrode is suitable for the most difficult samples, e.g. for low ionic strength samples, creams, emulsions, very viscous samples, wines, paint and samples with colloids. The encapsulated reference ensures high stability and long lifetime. The large cylindrical pH membrane provides fast response.

Fast responding

Large cylindrical pH glass membrane, sleeve diaphragm.

High stability and long lifetime

Encapsulated Ag/AgCl reference system

Specifications

Accuracy:	0.02 pH with pH3 Meter
Connector:	Screw cap S7
Dimensions (D x L) :	12 mm x 130 mm
Electrode Type:	Laboratory
Filling Solution:	LZW9500.99 KCl 3M
Length:	130 mm
Material:	Sensor Body: Glass
Operating temperature range:	0 - 60 °C
Parameter:	pH
Probe Junction :	Open with sleeve
Range:	0 - 12 pH
Sensor Type :	Glass
Special Features:	The encapsulated reference and the clog-free sleeve junction ensure high stability and long lifetime. The large cylindrical pH membrane provides fast response.
Temperature Range:	0 - 60 °C
Warranty:	6 months

Required Accessories

- AS7 cable / 1M / BNC for instruments w/ BNC connector (Item LZW9055.99)
