

Copper TNTplus Vial Test (0.1-8.0 mg/L Cu), 25 Tests

Product #: TNT860
ZAR Price: Contact Hach
Ships within 3-5 weeks

Expert Copper test made simple.

Copper TNTplus chemistry and your Hach spectrophotometer are engineered to simplify water analysis for accurate results, everytime.

For determination of Copper by the Bathocuproine Method.

Easy and safe handling

The innovative vial and reagent delivery makes tests easier to use than powder pillows or liquid reagents and significantly reduces spillage or contamination risk.

No reagent blank necessary

The high quality of TNTplus vials, tight reagent production controls, instrument calibration verification, and high instrument stability all combine to eliminate the need to run reagent blanks—saving you time and money!

Automatic method detection

The bar-coded vials allow for automatic method detection and measurement by the spectrophotometer, considerably increasing the speed of analysis. Errors are reduced as instrument averages 10 readings and rejects outliers from scratched, flawed, or dirty glassware.

Documented shelf life and COA

New 2D barcode details batch number and expiry date of reagents, which are documented along with the measurement result. An automatic warning is issued if expiry date has passed. Certificate of Analysis (COA) is available on RFID tag on the box.

Specifications

Instrument:	DR3900, DR6000, DR1900, DR2800, DR3800, DR5000
Method:	10238
Number of tests:	25
Parameter:	Copper
Platform:	TNTplus
Range:	0.1 - 8.0 mg/L Cu

Required Accessories

- Gloves, Disposable, Powder Free, Nitrile, Large (Item 2550503)
