

Stablcal Turbidity Standard, 200 NTU, 500 mL

Product #: 2660449
ZAR Price: Contact Hach
Ships within 3 days

Ready to use, stabilised Formazine Primary standard solution, 200 NTU, 500 mL bottle. Suitable for all turbidimeters. USEPA accepted for calibration purposes. For TL23, TU52, 2100Q, 2100N, 2100AN series.

Precise, Pre-mixed Formazin Solutions

With proprietary manufacturing technology, Hach prepares Stablcal Standards in precise concentrations at a wide variety of concentrations - providing accurate turbidimeter calibrations.

Based on Formazin Primary Standards

Stablcal Stabilized Formazin Standards contain the same light scattering polymer as traditional Formazin primary turbidity standards - and perform equivalently.

Enhanced Stability Saves Time and Labor

While Formazin primary standards can be prepared directly in the lab, the process is labor intensive and time consuming - and the diluted standards are not stable. Stablcal is a stabilized version of Formazin - providing repeatable results, without the time and effort required for lab-prepared standards.

Confidence in results

Hach was the first to apply Formazin as a turbidity standard in the drinking water industry, more than 40 years ago. Stablcal standards are based on decades of experience in turbidity measurement.

Specifications

Concentration:	200 NTU
Platform:	Solution
Quantity:	500 mL

Required Accessories

- Gloves, Disposable, Powder Free, Nitrile, Large (Item 2550503)
