**Hazardous**

Items with this mark may be considered hazardous under some shipping conditions.

If necessary, we will change your selected shipping method to accommodate these items.

**Contains mercury. Dispose of according to local, state and federal regulations.**

For determination of Chemical Oxygen Demand (COD) by the Reactor Digestion method. Hach Method 8000.

High Range Plus: 200 to 15,000 mg/L COD. This range is not USEPA Approved.

Pack of 150 vials.

### Simpler and Safer

Prepared COD reagents eliminate the need for measurement of corrosive and toxic chemicals. Just add sample to the COD vial, digest and measure. Photometric measurements provide accurate results without the equipment and effort required for titrations.

### Easy Disposal

Small reagent volumes used in Hach COD vials minimize the volume of spent silver, mercury and chromium waste. Customers in the contiguous 48 United States benefit from the availability of the ezCOD waste recycling program, which provides comprehensive transportation and disposal of COD vials.
