The High Output Airblast Cleaning System (230V) is a compressor in an outdoor enclosure for the LDO and ISEsc. It supplies air to a cleaning head which is mounted in front of the sensor. The HOAB, along with a cleaning unit attached to a sensor, will keep the sensor head clean for longer operation time in difficult applications.

Outdoor

The High Output Airblast Cleaning System can be installed outdoor.

Cleaning head not included

A cleaning head is not included and needs to be ordered separately depending on sensor type

Specifications
