

## Peek Salt Bridge, Ceramic Outer-Junction

<b>Product #:</b>	<b>SB-P2SV</b>
ZAR Price:	Contact Hach
Available	

Easily and inexpensively extend the life of your Hach differential sensors by periodically replacing the salt bridge and standard cell solution. For optimum performance, Hach recommends that differential sensor salt bridges be replaced every 6 months.

### **Lowers Lifetime Cost of Process pH Sensors**

The double junction salt bridge on all Hach pHDTM Differential pH / ORP Sensors is field-replaceable, and includes a FKM/FPM O-ring. Salt bridges are shipped in a salt solution to prevent dehydration / dry-out and can be stored in the shipping solution until needed. Salt bridges are available in a variety of materials and pre-packaged quantities.
