

CL17sc Calibration Verification Kit

Product #:	8568200
ZAR Price:	Contact Hach
Ships within 2 weeks	

The CL17sc Calibration Verification Kit includes two bottles of deionized water (500 mL), a chlorine standard (20 mL ampule), ampule breaker, syringe (50 mL), tubing, and fittings.

The CL17sc calibration curve is set at the factory for performance to specifications. User adjustment of the factory calibration curve is only recommended in two instances: if required by a regulatory agency for compliance reporting purposes or if a large repair of the analyzer is done.
